Career Objective

Computer Science undergraduate with a strong foundation in programming and a keen interest in AI/ML and software development, seeking opportunities to enhance technical skills and contribute to innovative real-world solutions.

Education

The LNM Institute of Information Technology
B.Tech in Computer Science and Engineering

Jaipur, Rajasthan
2023–2027

Technical Skills

Programming Languages: Python, Java, C, SQL

Web Development: HTML, CSS, JavaScript

Machine Learning: Scikit-learn, PCA, Grid Search, Model Evaluation

Data Processing & Analysis: Pandas, NumPy, SciPy, Seaborn, Matplotlib

Version Control: Git, GitHub

Projects

Deep Learning based Channel Estimation: Developed a deep learning-based wireless channel estimation system inspired by the Deep Learning-Based Channel Estimation architecture, modeling OFDM channel responses as 2D images and leveraging SRCNN + DnCNN networks for super-resolution and denoising-based channel reconstruction.

FinXplain: Built an explainable financial sentiment analysis pipeline combining FinBERT (109M parameters, fine-tuned on 4,674 Financial PhraseBank sentences) with GPT-2, achieving 78.4% test accuracy and empirically reproducing attention-based failure modes documented in Araci (2019).

DeepFuse: Implemented latent-space fusion and ControlNet-based conditioning techniques using PyTorch and OpenCV to preserve image geometry while enhancing textures, colors, and visual consistency through diffusion-guided synthesis.

Phishing URL Detection: Performed feature extraction and preprocessing on large-scale URL datasets, leveraging machine learning algorithms to detect suspicious patterns associated with phishing attacks and fraudulent domains.

Metro Train Failure Prediction: Implemented and compared multiple machine learning models including Scikit-learn-based Logistic Regression, KNN, Naïve Bayes, Random Forest, and SVM, improving failure prediction reliability through feature engineering and performance evaluation.

Plinth Tech Fest Website: Designed interactive wireframes, high-fidelity mockups, and reusable design components while collaborating with developers to ensure seamless design-to-development integration.

Amazon Clone: Developed a responsive e-commerce web application inspired by Amazon using React, implementing dynamic product listings, reusable UI components, and seamless user navigation.

Experience

Web Development Intern, Crystal Tech e-Solutions pvt. ltd.

Jun'25 - Jul'25

Designed and developed responsive web page layouts using HTML, CSS, JavaScript. Improved UI components & optimized website responsiveness for mobile & desktop devices.

Leadership & Activities

GDG Club: Led AI/ML & UI/UX workshops and built websites for campus events.

EFx India: Lead at EFx India 2026, organized at LNMIIT

ASME Student Chapter: Project head at ASME, LNMIIT

SANKALP Club: Organized outreach events for village students to promote education.

Plinth Organizing Team: Managed PR and logistics for LNMIIT's tech fest.

ACM Student Chapter: Contributed to tech events and peer learning initiatives.
